

Choose simplicity

The **Sunlight K3 Single** is the printer that lets you easily personalize your cards, printing full colour, text and barcodes on one side in a single pass.

Choose completeness

The **Sunlight K3 Dual** allows you to automatically personalize the front and the back of your cards, in full color or monochrome - in just one single pass

Single or Dual:

We got you covered

Cutting edge technology delivering high quality printing for bright, high definition, Microsoft™ certified 16.7 million of color graphics and photos.

EasyLoad

The **Sunlight K3** features a user-friendly system that combines the ribbon and the cleaning roll in a single cartridge. Inserting the cartridge is simple and logical.

Extra-thin cards

Extra-thin cards are growing in popularity. Lightweight and space saving, they are used for more and more applications. For this reason, **Sunlight K3** has extended the card range supported; it can hold card thicknesses starting from 0,229mm.

Rewritable printing capability

Sunlight K3 has the capability to erase and rewrite cards multiple times, useful for applications where the card life is extremely short: visitor badges, temporary passes etc. It enables you to eliminate waste and reduce cost!

A wide range of possible configurations are available
